**The Great War and The World: 1918 And Its Legacies**

**Coordinator: Dr. Arne Kislenko, Department of History, Ryerson University**

**Course Overview:** This series will feature a variety of lecturers from Ryerson University each talking about an aspect of the impact of WWI internationally and (importantly) what it has meant for our identities and the world order in general today. Individual sessions will focus in turn on different aspects, such as the British Empire in 1918, the Russian revolution, the impact of WWI on Canada, the war's effects on science and technology, and the emergence of nationalism in India. The series is coordinated by Dr. Kislenko who, in introductory and concluding lectures, will link these topics and provide an overview of the war's many legacies
