

## Technology Report – 2021 - AGM

In the fall of 2021, we were very pleased that Neil Kirby joined the Technology committee, adding a third host for the webinars. Neil is an electrical engineer with an extensive software background.

During 2021 the technology committee now consisting of Roger Tessier, Neil Kirby, and Len Klochek successfully hosted a total of 54 webinars. There were no incidents of lost transmission or coverage.

For fall 2021 the webinar login page which was previously a single static image with accompanying music, was changed to a video that contained course description, presenter bio, and copyright information. The video had embedded music which simplified screen sharing during login. A total of 24 videos were created, each of which used unique classical copyright free music.

In addition, a webinar break page with count down 5-minute timer was implemented.

Prior to presentation of the webinars, the committee, where required, supported the LU MCs as well as the presenters.

Attendee lost links were a challenge and this was to be addressed by the Tech group and the Registrar for the winter of 2022.
