

Technology Report

To the LUE Board

J. R. (Roger) Tessier
March 11, 2022

The Chair of the Technology Committee having resigned from the Board, the Webmaster has prepared this short report, with information provided by the former Chair .

Zoom Account

- Len paid the March Zoom invoice and requested reimbursement
- Need to decide how future monthly Zoom invoices will be handled (next invoice: April 6)
- Zoom Account ownership needs to be transferred

Board Member Interviews

- Len Klochek and Gerry Keating conducted video interviews with current Board members
- Gerry, Len and Glenn did a first review of the edited and linked-together interviews
- Complete video was 33 minutes in length
- Considerably more editing remains to be done, but the length will be reduced

Database of Membership Data

A backup taken in May 2021 (in spreadsheet format) was found, and seems to have all the data we need

Public Website

- Course outlines for the Fall 2022 season have been posted
- *Register* links for the Winter 2022 season will be removed as each series concludes (the Thursday link was removed last week)

Website Private Area

- https://www.learningunlimitedetobicoke.com/private-lu-board-repository/private-board-members-area_57/
- https://www.learningunlimitedetobicoke.com/wp-content/uploads/private/LUWebsitePrivateAreas_Draft.pdf
- Re-worked from the mock-up previously tabled, this is a place to post materials such as Committee materials reports, and to host group discussion on important issues
- The updated version makes use of WordPress features, and should require no programming expertise to keep it on air (not true of the mock-up)
- It is not yet secured with usernames and passwords, but the URL has been chosen to make intrusion unlikely
- I would like to schedule 1 or more Zoom meetings to introduce the facility to Board members before we resume operation in the Fall
